

Glue these five sides together. Regenerate box if your wood is a different thickness.

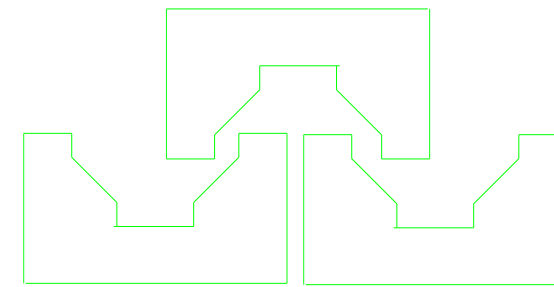

Don't glue the top to it, so you can service the components inside. The green slots are for the pieces below.

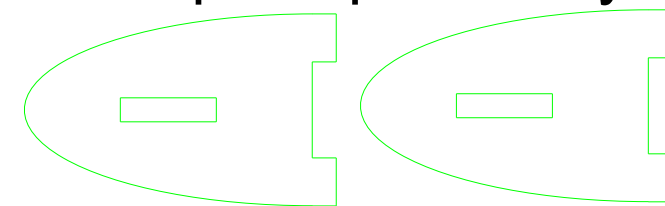

Attached LED light strip to this

These hold the above LED strip holder directly under the slot for the acrylic

These help keep the acrylic vertical

Engrave Acrylic Here. Some recommend mirroring the image horizontally as to engrave it backwards on the back which will be correct when looking through it.
